

ECS Anti-Bacterial Range

Cleaning Solutions

C170 AntiViral Clean and Protect – COVID-19 KILLER

The latest product from our range which is designed to kill 99.99% of enveloped viruses - including Coronavirus SARS-COV-2 (COVID-19).

- Independently tested to British Standard EN 14476 against Coronavirus.
- Effective in just 5minutes - killing 99.99% of viruses.
- Suitable for use on non-porous surfaces, and when used as recommended, leaves treated surfaces safe for human contact.
- Low VOC (<5%) - based on biodegradable solvents and cleaning agents.
- Mild cleaning action – for heavily soiled surfaces we recommend first cleaning with C160 Universal Anti-Bacterial Machine and Surface Cleaner. Then apply C170 and leave to act for 5minutes before wiping clean, for optimized virucidal action.

Available in easy to use 1litre trigger spray bottles, as well as 5litre, 10litre and 25litre containers.

C160 Universal Anti-Bacterial Machine and Surface Cleaner

This is a non aggressive, yet highly effective general purpose cleaner designed to neutralise surfaces of both gram positive and gram negative bacteria, fungicide and mildew as well as showing activity against enveloped viruses such as Hepatitis B and HIV.

Available in:

1litre bottles (12 per box - 2 trigger sprays per box - more available on request)

5litre (refill bottles)

Skin Care Products

PP040 - SANITIZER HAND GEL

A waterless alcohol based hand sanitizer designed for frequent use without the need for additional water which will effectively and quickly kill germs, fungi, and viruses.

Greater than 70% alcohol content, and includes humectants to help retain moisture in the skin which is lost through repeated cleaning.

Available in 5lt and 452ml containers.

PP060 - HYGIENIC ANTI-BACTERIAL HAND CLEANER

A gentle hand cleaning solution based on carefully selected soaps and detergents to help reduce the spread of infection and germs, whilst containing humectants to help retain moisture in the skin.

A solvent-free formulation, based on natural, biodegradable ingredients, making it low irritancy and kinder to skin.

Contains anti-bacterial additives for added protection and regular use helps to promote individual hygiene.

Available in 5litre and 1litre containers

PP014 - ANTI-BACTERIAL "GRITTY" HAND CLEANER

A more robust industrial strength hand cleaner containing abrasive action to cut through dried on dirt. Like all our hand care range, it contains humectants, preservatives and anti-bacterial components, and is solvent-free, based on carefully selected soaps and detergents, that are kinder to skin.

Available in 5litre containers with pump optional
