

ECS setting the standards in pressroom solutions

Specialist cleaning agents

Roller Care

Specialist chemistry for cleaning and maintaining printing rollers. All wash off easily with either water or suitable roller wash.

Product	Product Details
C770 Calcium Removal Jelly	For deep cleaning calcium deposits from the rollers.
C700 Anilox Cleaning Gel	For deep cleaning anilox rollers used for waterbased coating/ink printing.
SND160 Deep Clean Roller Paste	High viscosity paste used to clean inks of all types. Suitable for all roller compounds and with low VOC content.
SND114 Colour Change Paste	Viscous paste for fast colour changes in between jobs. Deep cleans on a variety of ink types and helps rejuvenate the roller.
C785 UV Anilox Cleaner	Gelled cleaning solution developed especially for deep cleaning aniloxes used in UV printing.
SND128 Bio Shampoo	Low VOC cleaner to deep clean and help restore and condition the rollers.
SND139 EPDM Roller Protector	A suitably formulated lubricant designed for application to the idling rollers to keep them conditioned when not in use. SND139 is suitable for use with UV and conventional rollers.
SND104 Idle Unit Lubrication Paste	High viscosity paste for dry running rollers to reduce friction and static build up.
C273 Chrome Roller Cleaner	For cleaning and desensitizing chrome rollers without damaging them.
C722 Ceramic Roller Cleaner	Specialist cleaner safe to use on ceramic rollers with excellent cleaning abilities.
SND143 Roller Polish	High viscosity cleaning and polishing solution for metal rollers. Removes oxidation and desensitizes rollers.
C431 Roller Wash	Extremely fast evaporating non-aromatic cleaner ideal for use requiring quick restarts. Designed for conventional roller qualities and ink types.
C427 UV Roller Wash	Safe for EPDM compounds and designed to quickly clean and degrease UV printing rollers.

ECS setting the standards in pressroom solutions

Specialist Pressroom Solutions

A must-have collection of niche cleaning additives to help regularly maintain any pressrooms.

Each chemical is uniquely formulated to help optimize the daily running of printing presses, with the ultimate aim of producing the highest quality printwork.

Product	Product Details
C723 Universal Pressroom Cleaner	Low VOC general purpose cleaner for press parts including side frames and such, which can also be used as a mild ink cleaner for UV, conventional and WB inks.
C909 Damperwash	Specialist emulsion cleaner for Damper Covers, with high cutting power and ability to clean inks, lint and waterbased deposits in one action.
SND100 Blanket Repair	Specialist gelled solution to hold to blankets, supplied in 250ml cans with brush applicator for ease of use. Used to lift and repair dead spots on blankets.
SND155 Deep Deglazer	Highly effective roller and blanket deglazer formulated with high viscosity to hold to surfaces, and with deep cleaning action removing all unwanted built up glaze.
C929 Ultrasonic Bath Cleaner	Highly effective solution for cleaning waterbased, UV and solvent inks. Maximises anilox cell output to enhance the printed work.
C711 Lamination Cleaner	Strong cleaning agent designed to dissolve and remove laminate glues and adhesives from unwanted surfaces.
SND501 Liquid Anti-Oxidant Spray	Liquid alternative to Anti Skin Aerosols. Non-Flammable and VOC-free alternative promoting environmental awareness.
SND108 Glass Cleaner	Non-streaking formula for quick and efficient cleaning of glass surfaces.
C949 Adhesive Remover LO	Low odour, but high strength formula for removing glues and adhesives.
C526 D-Tak	Strong solvency cleaning solution and tack remover with added reviving properties on deteriorated blankets and rollers. Contains anti-fungal agents.
C912 XXX Wash	High quality blanket and roller wash with exceptional rejuvenating properties.
C727 STR ECstra	Surface Tension Reducer to aid the wash cycle in promoting more effective cleaner, with added anti-calcium and anti-fungal action.
C655 Decalc Wash	Non-flammable, aromatic-free blanket and roller wash for automatic systems, with added anti-calcium action.
