

ECS Newsletter

Hello and welcome to the new look ECS newsletter.

As highlighted in previous newsletters ECS is undergoing a revamp of its company brochure, website and other marketing information. Working together with a local design and print company RJ-DA in Derby we hope the new look is welcoming to both our new and existing customer base.

As part of the remarketing we have employed the service of local film director Joel Fletcher of Dynamite Products to help capture and portray the concept, disciplines and mission of ECS. The new video can be seen on the soon to be launch new ECS website, www.ecsnottingham.co.uk

Darren Hallett has once again been out of the country, this time visiting our distributor in Scandinavia. Due to the strong partnership and relationship ECS shares with this partner we have seen growth in this market year on year. A true testament to the strength and ability of our partner!

Mange tak og må væksten og samarbejdet fortsætte længe.

If you have any questions or require further information please contact the team at ECS – sales@ecsnotts.co.uk

April 2010
Issue No: 41

ECS will be attending the IPEX 2010 exhibition. We can be found at Hall 6 and Stand E520.

Supporting the exhibition will be our MD Neil Fletcher, both Darren Hallett and Tom Cropper will be on hand to provide Technical and Commercial support and Amelie Poole will be on hand to meet current and new Export customers. Supporting us will also be some of our key partners from across the world. Deepak Palja of London International Graphics will be on hand to help support Indian enquires and Muhammad Shahid of Evergreen International will be available to aid and enquiries for Pakistan.

If you would like to make a pre booking to meet with any of the ECS team please contact us via sales@ecsnotts.co.uk where we can make the required arrangements.

As part of IPEX ECS are planning to bring a number of new products and concepts. These will include recyclable packaging, thermal lamination specific emulsions, and Calcium elimination automatic blanket washes along with other new products.

Soft Touch

A recent area for development has been the new ECS soft touch emulsion. Initial trials have proven successful and we hope to bring to IPEX printed samples for review. In the mean time if you require a sample for testing please contact sales@ecsnotts.co.uk
