

ECS setting the standards in pressroom solutions

Plate Care

It is well documented that ECS's concept is to manufacture and produce multipurpose products. This allows distributors to stock and supply a smaller range of lines. With the ever increasing range of printing plates ECS has formulated 4 key Plate cleaners suitable for even the most demanding plates as well as the key sundry products associated with plate care.

Name	Type	Colour	Brief
C200 - Everyday	General Purpose	White	A general purpose plate cleaner suitable for everyday use. It provides good levels of solvency and is suitable for both positive and negative plates. Ideal for cleaning freshly removed plates.
C201 - Power	Heavy Duty	Pink	A heavy duty solution which contains mild abrasives. It is perfect for removing dried ink, reviving stored plates and is suitable for use on some CTP plates.
C213 - Digi Clean	CTP	Green	A CTP / Universal solution which is suitable for use with conventional, thermal (both baked and unbaked) and CTP plates. Ideal for even the most sensitive of plates.
C214 - Solar	UV	Yellow	A powerful solution for cleaning even the most difficult of UV plates. Suitable for unbaked materials.

Additional sundry plate care products are available from ECS. These include:

- Wash Out Storage Gum
- Gum Arabic
- Machine Gum
- Plate etch

Plate cleaners and plate care sundry products are available in 1 and 5ltr containers (10 x 1ltr per box).
