## Food Packaging Range

**Waterbased coatings** – Products tested and accredited according to independent third parties for compliance to European Food Law, for direct (dried and/or fatty foods), and indirect food packaging. All products show excellent flexibility and protection and are well suited to a variety of packaging and labelling substrates

Product	Product Details
LMWB1000 LM Matt Emulsion	A quick drying matt emulsion, with excellent block and rub resistance.
LMWB4000 LM Gloss Emulsion	Fast drying and flexible double sided gloss offering grease resistance for fatty food contact.
LMWB4500 HS Gloss Emulsion	Single Sided High Gloss with excellent hold out and rub resistance.

**UV LMFC Varnishes** – Low Migration and non-direct Food packaging Compliant range of varnishes formulated for sheetfed and flexo applications consisting of food packaging, labels, pharmaceuticals as well as various commercial work. All varnishes are formulated in compliance with latest food packaging regulations to limit migration potential, as well as offering excellent chemical resistance, fast curing, adhesion and low odour properties.

Product	Product Details
